ECONOMIC AND FINANCIAL REVIEW - JUNE 2021

OVERVIEW

Following an unprecedented decline in the economy last year, economic activity in Saint Christopher (St Kitts) and Nevis remained subdued in the first six months of 2021.

The effects of the COVID-19 pandemic are anticipated to continue to weigh on output for the remainder of the year.

Pent up travel demand, supported by the recovery in advanced economies and fiscal support by the federal government could accelerate the economic recovery.

ECONOMY (REAL SECTOR)

Muted economic activity in the first half of 2021 reflected declines in critical sectors of the economy, as COVID-19 and associated containment measures, continued to constrain economic activity. While activity is estimated to have remained below pre-pandemic levels in the construction sector, several private sector projects in the hotels sub-sector, including a luxury villa project at the Royal St Kitts Hotel and the Hillsboro Suites and Residences projects continue. Additionally, in the public sector, spending on the government's capital programme rose by 3.3 per cent.

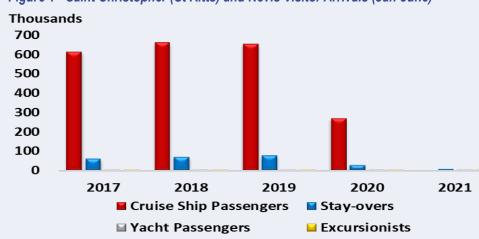

Figure 1 - Saint Christopher (St Kitts) and Nevis Visitor Arrivals (Jan-June)

Activity in the tourism industry plummeted in the first six months of 2021, relative to the same period last year, as entry protocols for visitors remained stringent. The total number of visitor arrivals decreased by 97.9 per cent to 6,389, reflecting a decline in stay-over visitors from all source markets, yacht passengers and excursionists. Cruise passengers were absent, since there were no cruise calls (see figure 1). This total represents the lowest number of visitor arrivals recorded in the first half of any year in recent history.

Subdued activity in key productive sectors contributed to lower output in significant service sectors such as transport, storage, and communications.

Positive developments in other productive sectors, however, helped to buoy economic activity. Agricultural output increased in the first half of 2021, partially reflecting increased public investment targeted at boosting agricultural production. Total crop production rose by 25.0 per cent to 605.4 kilograms, above the past five years' average. Livestock production and output in the fishing sector, which also benefitted from increased public investment, rose. Production in the manufacturing sector also increased relative to the corresponding period of the previous year, as manufacturing plants remained open for most of the period and restrictions on movement eased.

The general price level increased in the first six months of 2021, a deviation from the deflationary pressures observed in recent years. More specifically, the consumer price index rose by 1.0 per cent, on a period average basis, a reversal of the 1.3 per cent decline recorded one year earlier (see figure 2). The inflationary pressures mainly reflected increases in the price of communication (7.4 per cent), transport (6.2 per cent), and housing, utilities, gas, and fuels (0.8 per cent).

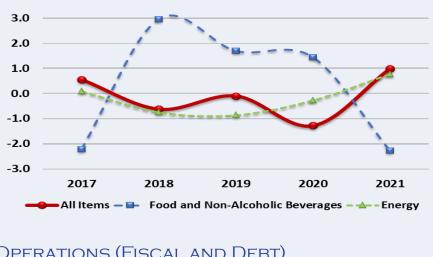

Figure 2 - Saint Christopher (St Kitts) and Nevis Consumer Price Index Percentage Change (period average)

GOVERNMENT OPERATIONS (FISCAL AND DEBT)

4.0

In the first half of 2021, the government's fiscal operations returned to its medium-term trend of a surplus position. An overall surplus of \$89.4m was recorded, following an overall deficit of \$28.3m in the corresponding period of 2020, when strict lockdown measures were first implemented (see figure 3).

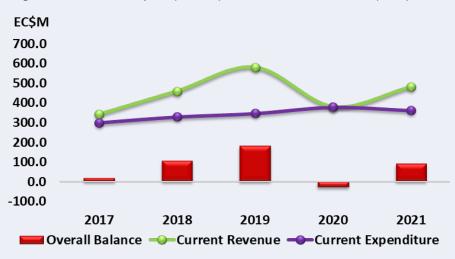

Figure 3 - Saint Christopher (St Kitts) and Nevis Public Finance (June)

Developments on the current account mainly influenced the turnaround in the fiscal balance. Current revenue is estimated to have increased by 26.4 per cent to \$480.4m, associated with a 77.5 per cent expansion in non-tax revenue (Citizenship by Investment receipts being the most significant component). However, a 9.0 per cent contraction in tax revenue mitigated the rise in current revenue as economic activity remained slow (see figure 4). Meanwhile, current expenditure declined by 4.5 per cent to \$361.3m (see figure 5).

These developments led to a widening of the current account surplus from \$2.0m to \$119.0m in the first half of 2021, which is 18.8 per cent higher than the average surplus recorded in the past five years. On the capital account, expenditure rose by 3.3 per cent to \$67.7m.

Figure 4 - Government Revenue, Jan-Jun 2021 (EC\$M)

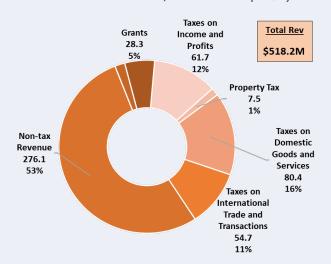

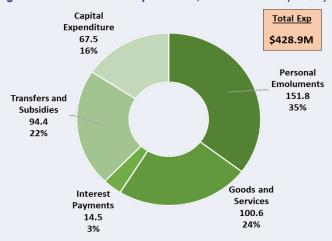

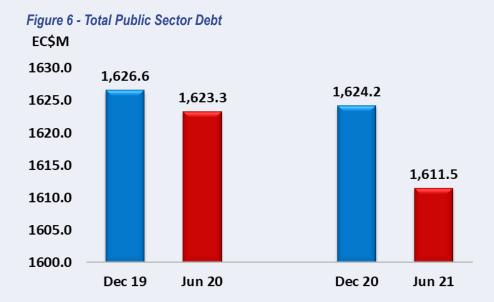

Figure 5 - Government Expenditure, Jan -Jun 2021 (EC\$M)

The total disbursed outstanding public sector debt decreased by 0.8 per cent to \$1,611.5m at the end of June 2021, as the government continued to service its obligations (see figure 6). The lower total debt level reflected declines of 0.7 per cent and 0.9 per cent in the indebtedness of central government and public corporations, respectively.

BANKING DEVELOPMENTS (MONETARY)

Broad money liabilities (M2), which comprises currency in circulation and deposits, rose by 1.3 per cent to \$2,867.8m in the first six months of 2021. This increase mainly reflected an uptick in other deposits in national currency, but was partly mitigated by declines in transferrable deposits in national currency (mainly demand deposits and current accounts) and foreign currency deposits.

Domestic claims (credit) rose by 30.6 per cent to \$653.8 in the first half of 2021, nearly double the average domestic claims recorded over the past five years, as the government continued to draw down on its deposits amidst the pandemic. Hence, a 4.5 per cent decline in net liabilities (deposits) to the general government was observed. A

7.1 per cent increase in private sector claims, reflecting an uptick in both household (8.9 per cent) and business (4.1 per cent) claims, also contributed to the growth in domestic claims (see figure 7).

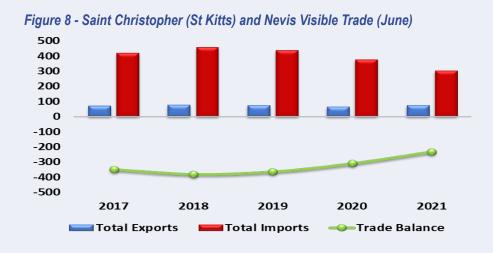

Figure 7 - Saint Christopher (St Kitts) and Nevis Domestic Credit Percentage Change (June)

The ratio of nonperforming loans to gross loans in the banking sector stood at 24.4 per cent, 19.4 percentage points above the ECCB's tolerable limit and 2.2 percentage points higher than the average ratio over the prior five years. Notwithstanding, the Federation's banking system remained liquid at the end of June 2021.

EXTERNAL TRADE

The merchandise trade deficit narrowed by 25.1 per cent to \$232.4m during the first half of 2021, the lowest trade deficit recorded in the past five years. This development was mainly driven by a contraction in import payments, partly associated with the decline in household and business incomes. An uptick in export receipts also contributed to the narrowing of the trade balance (see figure 8).

Consistent with the decline in visitor arrivals, gross travel receipts are estimated to have decreased by 82.7 per cent to \$20.3m in the first six months of 2021.

Economic and Financial Review - June 2021 | 5

OUTLOOK

ollowing an unparalleled contraction in 2020, economic activity in St Kitts and Nevis is projected to remain subdued in 2021 as the country continues to grapple with the COVID-19 pandemic.

- While activity in the tourism industry was muted in the first half of the year, tourist arrivals are expected to increase in the latter half, particularly in the last quarter, as vaccination rates rise and stringent entry protocols ease. Agricultural output and production in the manufacturing sector are expected to continue to expand. Ongoing public and private sector projects will contribute to construction activity in the last half of the year.
- Risks to this outlook are, however, skewed to the downside. Slower than expected vaccination rates and the emergence of new variants could delay containment of the virus globally, which could decelerate the Federation's rebound. St Kitts and Nevis also remain vulnerable to natural disasters, particularly in the second half of the year.
- On the upside, pent up travel demand and the economic recovery in advanced economies could accelerate demand for tourism services in St Kitts and Nevis and boost economic activity in the latter part of the year. Moreover, the continued fiscal support by the Federal Government could continue to bolster economic activity.
